***Claim Amended***

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

In claim 9, line 4, "o" has been changed to "of".

***Claims Allowed***

Claims 9-14 are allowed. The claims are allowable because the prior art does not anticipate nor render obvious the invention of an automatic transmission wherein the transmission includes a plurality of alternately engageable gear ratios between an input shaft and an output shaft by selectable claw clutches, and a torque controller in another power path between the shafts, wherein a hydraulic pressure switch in a hydraulic circuit for controlling the torque controller changes when the pressure in the circuit increases above a required value.

***Prior Art Discussed***

The reference cited by the examiner is deemed pertinent to applicant's disclosure. Kayano '133 is applicant's prior patent, but does not claim the pressure switch 1003.

***Conclusion***
